PROFILE

Software developer with 5+ years of experience building web and mobile products from the first screen to store release: healthcare platforms, video streaming, e-reading and Web3 apps. I lead large rewrites, framework upgrades and quality automation, and I now work across the full stack.

EXPERIENCE

Vianova

2021 – Present

Software Developer · Frontend & Mobile → Full Stack

- **Led the rewrite** of a healthcare care-management platform from Vue to React, one screen at a time, with automated tests that compare the new app against the old one.
- Built **patient care features across frontend and backend**: patient profiles, care plans, lab results, billing claims, and in-app video and phone calls.
- Made the platform **safe for many client organizations**: data separation, role-based access and timezone-correct dates.
- Built a **video-learning platform** with live streaming, realtime chat, subscriptions, gift plans and English/Arabic support.
- Led a **children's reading app** for iOS and Android from 2022 to 2025: book reader (PDF and EPUB), barcode scanning, rewards and notifications. Shipped regular releases and upgraded it across major versions.
- Built a **bookstore shopping app** for iOS and Android, with push notifications and checkout.
- Set up **AI-assisted QA scenarios and quality gates**, so each change is tested before it merges.

Incentiv

2024

Frontend Developer

- Built the web app for a **Web3 smart wallet**: dashboard, balances, passkey sign-in and onboarding.

AvahiTech

Freelance

Frontend Developer

- Built a **smart business dashboard with AI features** for digital transformation: professional headshot generation and an AI workplace assistant, from PDF upload to chat.
- Helped with backend features in **Python (FastAPI)**.

OPEN SOURCE

- Maintained forks of **epubjs-react-native** and **react-native-pdf**, used in a production reading app.

EDUCATION

[Degree, Field of study]

WHAT I DO

Rewrites & migrations

Move a live app to a new framework, step by step, with parity checks.

Mobile apps

iOS and Android, from build to store release.

Multi-tenant platforms

Separate data, roles and permissions for each client.

Streaming & media

Live streams, realtime chat, video, PDF and EPUB.

Payments

Web and in-app subscriptions, gifts, promo codes.

AI features

Document chat, AI images, AI-assisted QA.

Full stack

APIs, databases, background jobs, performance.

SKILLS

Frontend

React Next.js Vue Nuxt

TypeScript Tailwind

Mobile

React Native iOS Android

Backend

Laravel / PHP Python / FastAPI

MySQL

Quality

Playwright Vitest CI/CD

Services

Stripe Firebase AWS IVS

Twilio

Localization

Multi-language Arabic RTL
