# Gentrit Rashiti

Frontend & Mobile Developer · Full Stack

gentrit.rashiti2@gmail.com
Kosovo · Remote
LinkedIn · github.com/gentritr1

## PROFILE

Software developer with 5+ years on web and mobile products, from the first screen to store release: healthcare platforms, video streaming, e-reading and Web3 apps. Part of two platform rewrites, several framework upgrades and quality automation, now across the full stack.

## EXPERIENCE

### Vianova

2021 - Present

Software Developer · Frontend & Mobile → Full Stack

- **Healthcare care-management platform**, rewritten from Vue to React one screen at a time, with automated tests that compare the new app against the old one.
- **Design system for the new React platform**: 41 accessible components on one shared token system, built from research and AI-agent reviews, with every release checked automatically for contrast and accessibility.
- **Patient care features across frontend and backend**: patient profiles, care plans, lab results, billing claims, and in-app video and phone calls.
- **Multi-tenant platform work**: data separation for each client organization, role-based access and timezone-correct dates.
- **Video-learning platform**, rebuilt from scratch on Nuxt 3: live streaming, realtime chat, subscriptions, gift plans and English/Arabic support.
- **Coaching app for a leadership program** for iOS and Android, 2022 to 2024, built from an empty template: weekly tasks, worksheets, podcasts and video.
- **Children's reading app** for iOS and Android, 2022 to 2025: PDF and EPUB reader, barcode scanning, rewards, store releases and framework upgrades.
- **Bookstore shopping app** for iOS and Android: push notifications, checkout.
- **AI-assisted QA scenarios and quality gates**, so each change is tested before it merges.

### Incentiv

2024

Frontend Developer

- Web app for a **Web3 smart wallet**: dashboard, balances, passkey sign-in and onboarding (frontend layer).

### AvahiTech

Freelance

Frontend Developer

- **Smart business dashboard with AI features** for digital transformation: professional headshot generation and an AI workplace assistant, from PDF upload to chat.
- Frontend in **React and Next.js**, with **AWS** services.

## OPEN SOURCE

- Forks of **epubjs-react-native** and **react-native-pdf**, maintained and used in a production reading app.

## EDUCATION

### Bachelor's degree

UBT

## CAPABILITIES

**Rewrites & migrations**
Move a live app to a new framework, step by step, with parity checks.

**Mobile apps**
iOS and Android, from build to store release.

**Multi-tenant platforms**
Separate data, roles and permissions for each client.

**Streaming & media**
Live streams, realtime chat, video, PDF and EPUB.

**Payments**
Web and in-app subscriptions, gifts, promo codes.

**AI features**
Document chat, AI images, AI-assisted QA.

**Full stack**
APIs, databases, background jobs, performance.

## SKILLS

**Frontend**

React · Next.js · Vue · Nuxt · TypeScript · Tailwind

**Mobile**

React Native · iOS · Android

**Backend**

Laravel / PHP · MySQL

**Quality**

Playwright · Vitest · CI/CD

**Services**

Stripe · Firebase · AWS IVS · Twilio

**Localization**

Multi-language · Arabic RTL
